OBJECTIVE: To work in a friendly, relaxed and creative environment designing and maintaining websites. To work with colleagues who value collaboration, dialogue and teamwork in pursuit of shared goals and objectives. I am particularly interested in creative challenges that utilize my fine arts background, creativity and experience to create, modify and implement graphics in web design.

WORK EXPERIENCE:

Isobar/Molecular (Contract Position) - 02/01/11 – 07/15/11
343 Arsenal Street, Watertown, MA 02472
Interactive Developer
Create and modify semantic, efficient and cross-browser compliant CSS2/3 and HTML for client websites. Troubleshoot and correct CSS and HTML related browser compatibility issues. Perform basic updates to XML documents in order to implement content edits for client sites.

Fidelity Investments - 03/30/08 – 03/12/10
245 Summer Street, 7th Floor, Boston, MA
Senior Software Developer
Create new CSS/DHTML codebase for the production environment. Create stand-a-lone layout components for pages using CSS, HTML and DHTML that is cross-browser, cross-platform compatible and accessible for use on the live corporate site. Optimize components for maximum download performance and reusability. Troubleshoot and correct class conflicts in corporate stylesheets. Create and/or modify CSS styles to address issues of layout, design, accessibility and cross-browser compatibility. Implement quick HTML/CSS edits/updates to address Quality Assurance issues. Create and modify HTML/SHTML documents based on corporate design templates and specifications. Modify and update site Javascript elements including pop-up notification, email scripts and image effects. Create, edit and convert .gif or .jpg images and insert into web documents.

Fidelity Investments (Darwin Partners Contract Position) - 11/2005 – 03/30/08
